

RetroCrea

Energy Division

Your partner for maintenance,
repair and consulting

RetroCrea

Energy Division

RetroCrea Energy Division is supporting you to take up daily challenges of energy production and Hydro-Electrical or Thermal power plant operation.

Our speciality: salient poles generators and their associated auxiliary systems.

We put all of our experience and reactivity at your disposal to improve reliability and availability of your equipment in the area of supply, consulting and service.

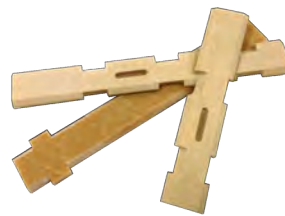

Consumables for maintenance and repair:

- Dielectric cleaning solvent
- Resins & loads
- Varnishes & paints
- Micaceous insulating tapes
- Felts, ropes & lashings
- Bolting and locking systems
- Off the shelf tooling
- Brazing materials & protections
- PPE
- ...

Spare parts:

- Tailor made bolting
- Electrical insulators
- Seals and gaskets
- Slot wedging
- Stator end-winding caps
- Diodes
- Carbon brushes & brush holders
- Winding binding parts
- Rotor poles insulating frames
- Braking pads
- Copper connections
- Filters
- Sensors & instruments
- Heat exchangers
- ...

We can supply spare parts according to your original drawings and specifications or perform retro-engineering.

Tooling:

- Magnetic core repair kit
- Semi-automated stator slot wedging ripple spring measurement kit
- Manual air-gap measurement
- Custom made maintenance tools
- Tooling design package on request

Consulting:

- Creation and improvement of maintenance procedures
- Support for repair works
- Support to tender specification analysis and redaction
- Advice on critical spare parts management
- Development of Maintenance staff working skills
- ...

You have a problem or a specific requirement,
we have a solution.

Feel free to contact us for any request
